

HB 6005

It is understandable that with the recent budget crisis, cut backs need to be made. Nevertheless, not at the expense of the most venerable people within our society. As a parent & DDS caregiver I believe to close the dwellings that these individuals call home should be reconsidered.

With no fault of our own, it would be an injustice if someone just stepped in and removed us from the places we call home. Not to mention the disappearance of the people who care for these individuals who are in most cases the closest thing to family that they will ever know.

Unlike us most of the people affected do not have a voice. On behalf of them I ask that you find a way to protect my fellow citizens' human rights as well as hold fast to our mission statement.
